## BACKGROUND \& OBJECTIVES

The LA Governance Reform Project (the LAGRP) was created by researchers with expertise on government and representation to address shortcomings in local governance for the City of Los Angeles. The Committee is independent, non-partisan, funded by philanthropic donations, and seeks only to assist the City of Los Angeles and its residents with reforming local institutions to improve the transparency, equity, ethical standards, and representational capacity of local governments.

In pursuit of these goals, the LAGRP engaged ISA to conduct quantitative research among residents of the City of Los Angeles to assess current feelings on City government and to ascertain support, opposition, and areas of concern with respect to reform proposals.

The objectives of this research are to:

1. Assess current feelings on the state of the City of Los Angeles and favorability towards officials
2. Understand residents' perception of Council representation
3. Understand residents' support or opposition on reform proposals
4. Determine differences by demographic backgrounds or political allegiance

The LAGRP plans to use insights from this research to inform recommendations to reform the government of the City of Los Angeles.

## OVERALL FINDINGS

- Angelenos are mixed when it comes to how they feel things are going in the city currently with half feeling things are going well and the other half feeling things are not so good.
- Similarly, there is a split between those that think the City of Los Angeles Government is effective and ineffective.
- Some demographic skews do emerge. Males, younger adults, Caucasian and mixed ethnicity residents, more educated, higher income that have lived in LA for less than 30 years tend to have a more positive outlook on these measures than other demographic groups.
- Favorability ratings for city and state officials/departments are neither positive nor negative. Those that have a more positive outlook on the City and Government in general exhibit much more positive ratings for city officials and departments.
- Overall, residents feel their views only matter a little to city officials. Residents also feel that officials are too focused on big money interests. The more educated and higher income residents, however, do tend to believe their views are taken into careful consideration.
- Perhaps because residents don't feel their views are taken into consideration, most residents have not tried to contact a council member. There is a skew with demographics here as well. Ethnic groups, lower education and lower income are more likely NOT to have tried to contact a council member. More information on how to reach city officials put out on broadcast TV or social media could help educate this group on how and who to contact.
- Reaction to the reform proposals is generally positive. Residents would be in favor of increasing the number of council members from 15 to 25 . Going up to 30 or more would not be recommended.
- Similarly, the proposal to increase the LAUSD Board was also well received. All residents (especially those with young children in the household) would support an increase from 7 members to 15 or more.
- There is a concern though when it comes to the cost. The expense of paying for more council members and office staff is important to the residents in their decision to support the expansion of the council.
- If part of the proposal included a cap or maximum expense, that would help sway or solidify support of the expansion proposals.

## OVERALL FINDINGS

- Generally, there is a feeling that LA City has a fair amount of corruption. The more "connected" a resident is (more educated, higher income) the less belief there is corruption, however.
- There is widespread support for ethics rules reform. The proposal with the most favorability is "Strengthening rules regarding lobbyists, gifts and/or campaign contributions".
- When District lines need to be re-drawn, residents feel it is better and will help to reduce corruption if a neutral party or commission were to do the redistricting.
- In fact, if on the ballot today, most would vote in favor of a redistricting commission for both LA City and LAUSD School districts.
- Another bad look is having council members decide on land use deals. Residents feel this will invite more corruption and would not be a good idea.

## DETAILED FINDINGS

Notes:
Among residents surveyed for this research the median time lived in the city of Los Angeles is 29 years. Most are registered to vote (92\%), with about 4 in 10 claiming to be Liberal/Progressive, 4 in 10 Moderate/ $M$ of $R$, and 2 in 10 Conservative.

In terms of the primary source for news and information about important matters, residents surveyed indicate television as a main source ( $27 \%$ broadcast TV and $23 \%$ Cable stations), just over one-third indicate they get news from online sources ( $21 \%$ social media and $16 \%$ internet news). Radio, Newspapers and Podcasts collectively are the source for about 1 in 10 residents.

When asked how frequently various sources are used for news and information about politics and government in Los Angeles, 4 in 10 say they use Local TV Stations daily. Just over half indicate they almost never use community focused papers like The Sentinel or La Opinion.

## Views on Los Angeles Government

Residents have mixed feelings about how things have been going in Los Angeles recently, with half saying "Excellently" or "Pretty well" and half "Not so good" or "Poorly".

- Residents that have lived in Los Angeles for less than 30 years, males, those with liberal/progressive views, younger adults, those of Caucasian or mixed ethnicity, more educated with higher income and those having children in the household under 18 years of age index higher on having a positive impression of how things have been

Overall, how would you say things in Los Angeles have been going recently?

|  | Weighted <br> Frequency | Percent |
| :---: | :---: | :---: |

## Los Angeles Leaders and City Officials

Respondents were asked to rate their favorability of various government personnel and departments. Overall, results are not strongly positive nor are they strongly negative. In many cases, residents provide a neutral rating or claim not to have enough information to have an opinion.

- Highest favorability ratings were received for Governor Gavin Newsom and Los Angeles Mayor Karen Bass.
- Favorability is lowest for the Los Angeles City Council and the Los Angeles County Board of Supervisors.
- Liberals, and (perhaps not surprisingly) those that feel things in Los Angeles are going well or feel the LA City Government is effective are much more favorable to all government personnel and departments.

For each of the following, please tell us whether your view is favorable or unfavorable. (Avg. mean 5 pt. scale 5=Very Favorable, 1=Very unfavorable, 3=Neutral)

|  | Total <br> Mean | Male | 18-29 | 30-39 | 40-49 | White | Other/ <br> Mixed | Post <br> Grad | \$100K+ | Kids in HH <18 | Liberal | Lived in LA $<10 \mathrm{yrs}$. | Lived in LA 10-29 yrs. |

| Weighted Base | 1,624 | 201 | 606 | 571 | 247 | 204 | 694 | 481 | 245 |

Only one in four Los Angeles City residents feel their views (and those of others like them) are carefully considered by city officials. About half feel their views matter only a little and almost one-third feel their views have almost no impact. This sentiment is likely part of the reason for the lower favorability ratings.

- Residents with higher education, and those with positive feelings towards Los Angeles in general as well as those that feel the LA Government is effective are much more likely to feel their views are carefully considered by city officials.

Residents feel that the leaders focus most of their attention on big money interests, lobbyists, and developers (66\%).

- Similarly, higher educated and those with positive views of the City/Government more strongly believe leaders are well connected with their constituents.

Would you say that your views and the views of others like you are carefully considered, matter a little, or have almost no impact?

| My Views (are/have): | Weighted <br> Frequency | Percent |
| :--- | :---: | :---: |
| Carefully considered | 424 | $26 \%$ |
| Matter only a little | 708 | $44 \%$ |
| Almost no impact | 492 | $30 \%$ |
| Weighted Base | $\mathbf{1 , 6 2 4}$ | $\mathbf{1 0 0 \%}$ |

Which comes closer to your view?

|  | Weighted <br> Frequency | Percent |
| :--- | :---: | :---: |
| Leaders are closely connected to <br> the population | 550 | $34 \%$ |
| Leaders focus on big money <br> interests | 1,074 | $66 \%$ |
| Weighted Base | $\mathbf{1 , 6 2 4}$ | $\mathbf{1 0 0 \%}$ |

|  |  | INDEX TO TOTAL |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Status of LA Recently |  |  |  | Effectiveness of LA City Government |  |  |  |
|  | Total Percent | Post Grad | Excellent | Pretty Well | Not So Good | Poor | Very Effective | Somewhat Effective | Somewhat Ineffective | Very Ineffective |
| Carefully considered | 26\% | 196 | 288 | 131 | 35 | 23 | 315 | 96 | 50 | 38 |
| Matter only a little | 44\% | 73 | 41 | 116 | 120 | 59 | 30 | 130 | 114 | 41 |
| Almost no impact | 30\% | 53 | 27 | 50 | 127 | 227 | 20 | 60 | 123 | 240 |

| Leaders are <br> closely <br> connected to <br> the population | $34 \%$ | 165 | 226 | 135 | 50 | 24 | 241 | 121 | 38 |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Leaders focus <br> on big money <br> interests | $66 \%$ | 67 | 35 | 82 | 126 | 139 | 27 | 89 | 132 |
| Weighted Base | $\mathbf{1 , 6 2 4}$ | $\mathbf{2 0 7}$ | $\mathbf{2 0 1}$ | $\mathbf{6 0 6}$ | $\mathbf{5 7 1}$ | $\mathbf{2 4 7}$ | $\mathbf{2 0 4}$ | $\mathbf{6 9 4}$ | $\mathbf{4 8 1}$ |

Interestingly, while many residents do not believe their views are carefully considered, more than half have never attempted to contact a member of the City Council or their office ( $60 \%$ ). Of those that have contacted a member of the City Council, more than half say they were not able to get the help they were looking for.

Have you ever attempted to contact a member of the city council or their office? If yes, what was your experience?

|  | Weighted <br> Frequency | Percent |
| :--- | :---: | :---: |
| Yes, and was able to receive <br> help | 261 | $16 \%$ |
| Yes, but did not get anyone to <br> help me | 310 | $19 \%$ |
| Yes, while not able to help I was <br> satisfied with response | 85 | $5 \%$ |
| No | 968 | $60 \%$ |
| Weighted Base | $\mathbf{1 , 6 2 4}$ | $\mathbf{1 0 0 \%}$ |

- Males, mid aged adults (between 30 and 50 years of age), those of Caucasian or mixed ethnicity, more educated with higher income, married with kids in the HH are more likely to have contacted members of the city council and to be satisfied with the result. Liberals and residents that feel things in Los Angeles are going well or feel the LA City Government is effective also skew this direction.

## Los Angeles City Council Size and Reform Options

Just over half of all residents surveyed (57\%) feel that the current districts are too large, that each should have fewer people for a council member to represent. This is a fairly universal finding by sub-groups.

After being exposed to examples of other cities where the number of residents per district is fewer than Los Angeles, the majority of those that felt the current district size of Los Angeles seemed OK kept that opinion (70\%).

LA City Council has 15 members, for about 270,000
people per district. Would you say ...

|  | Weighted <br> Frequency | Percent |
| :--- | :---: | :---: |
| These are too large. Each district <br> should have fewer people for a <br> council member | 926 | $57 \%$ |
| This number of districts and <br> their size seems OK | 698 | $43 \%$ |
| Weighted Base | $\mathbf{1 , 6 2 4}$ | $\mathbf{1 0 0 \%}$ |

Compared to other places (Chicago, San Francisco, New York) that have fewer people per district, would you say ...

|  | Weighted <br> Frequency | Percent |
| :--- | :---: | :---: |
| These are too large. Each district <br> should have fewer people for a <br> council member | 207 | $30 \%$ |
| This number of districts and <br> their size seems OK | 491 | $70 \%$ |
| Weighted Base | $\mathbf{6 9 8}$ | $\mathbf{1 0 0 \%}$ |

When asked if residents would favor an increase to the size of the city council from 15 to at least 21 (and thereby lowering the number of citizens per council member), three-quarters (76\%) say they are in favor of that proposal. Most of that group (87\%) would also favor an increase up to at least 25 council members.

Would you favor increasing the size of the city council from 15 to at least 21?

|  | Weighted <br> Frequency | Percent |
| :--- | :---: | :---: |
| Yes | 1,227 | $76 \%$ |
| No | 397 | $24 \%$ |
|  | Weighted Base | $\mathbf{1 , 6 2 4}$ |

Would you favor increasing the size of the city council from 15 to at least 25?

|  | Weighted <br> Frequency | Percent |
| :--- | :---: | :---: |
| Yes | 1,065 | $87 \%$ |
| No | 162 | $13 \%$ |
|  | Weighted Base | $\mathbf{1 , 2 2 7}$ |

All participants were asked if they would favor an increase to as many as 30 or more council members. This is not a recommended option as just over half ( $52 \%$ ) of the Los Angeles residents surveyed would NOT support an increase of that size. Of the $48 \%$ that would support 30 or more council members, the median number mentioned each district should have is 35 .

- Sub-groups supporting an increase to 30 or more council members include those aged 30-39, with Post Graduate degrees, with children in the household, living in the city less than 10 years. Additionally, residents that have positive feelings about the status of the city or feel the City Government is effective also support this larger increase.

Would you favor increasing the size of the city council from 15 to $\mathbf{3 0}$ or more than $\mathbf{3 0}$ ?

|  |  | INDEX TO TOTAL |  |  |  |  |  |  |  |  |  |  |  |

Another idea proposed to participants of this research is to set aside "at-large" seats to represent the whole city. About 6 in 10 residents initially say they would be in favor of having some seats elected at-large. Under the assumption that some seats in the city council would be set aside for as "at-large", about 4 in 10 would prefer at-large seats elected across groups of four to five districts while 3 in 10 would prefer at-large seats elected city wide.

- Younger residents 18-29 years of age, and residents with a positive outlook on the status of the City or those that feel the City Government is effective are more likely to favor "atlarge" council seats.

## Expense of City Council Expansion

The cost associated with paying more council members, staff and increased office expenses to expand the number of council members is "Very" or "Somewhat" important to nearly 9 of 10 residents.

- This trend is consistent among sub-groups.

Having a limit to the total cost associated with council expansion may encourage support of an expansion as about $65 \%$ indicate it would make them "Much More" or "Somewhat More" likely to support the proposal.

- This trend is consistent among sub-groups.

How important would the costs of government be to you as you consider whether to support council expansion?

|  | Weighted <br> Frequency | Percent |
| :--- | :---: | :---: |
| T2B | $\mathbf{1 , 3 7 5}$ | $\mathbf{8 5 \%}$ |
| Very important | 680 | $42 \%$ |
| Somewhat important | 695 | $43 \%$ |

| Weighted Base | $\mathbf{1 , 6 2 4}$ | $\mathbf{1 0 0 \%}$ |

## Los Angeles Unified School District Reform Options

With only 7 members of the School Board and about 600,000 residents in each district, participants in the research were asked if they would favor increasing the size of the School Board to at least 11 members, which would in turn reduce the number of residents per council member to about 382,000. Nearly threequarters (71\%) indicated they would be in favor.

Of that group, 8 of 10 said they would be in favor of increasing the size to 15 School Board members, and almost 8 in 10 of those also favor an increase to more than 15 members.

Would you favor increasing the size of the School Board from 7 to at least 11?

|  |  | Weighted <br> Frequency |
| :--- | :---: | :---: |
| Percent |  |  |
| Yes | 1,151 | $71 \%$ |
| No | 473 | $29 \%$ |
|  | Weighted Base | $\mathbf{1 , 6 2 4}$ |

Would you favor increasing the size of the School Board from 7 to 15?

|  | Weighted <br> Frequency | Percent |  |
| :--- | ---: | :---: | :---: |
| Yes | 960 | $83 \%$ |  |
| No | Weighted Base | $\mathbf{1 9 2}$ | $17 \%$ |
|  |  |  | $\mathbf{1 0 0 \%}$ |

Would you favor increasing the size of the School Board from 7 to more than 15?

|  | Weighted <br> Frequency | Percent |
| :--- | :---: | :---: |
| Yes | 748 | $78 \%$ |
| No | 211 | $22 \%$ |
|  | Weighted Base | $\mathbf{9 6 0}$ |

## District Lines

When asked about their thoughts on how District lines should be drawn, three-fourths (76\%) of Los Angeles residents state this should be done by a neutral party. Similarly, most residents stated they would vote FOR an independent redistricting commission for the City Council districts ( $75 \%$ ) and FOR an independent redistricting commission for the School Board districts (76\%).

Are district lines better drawn by officials who run for election or by a neutral agency?

|  | Weighted <br> Frequency | Percent |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Neutral party | 1,239 | $76 \%$ |  |  |  |
| Elected officials | 385 | $24 \%$ |  |  |  |
| Weighted Base |  |  |  | $\mathbf{1 , 6 2 4}$ | $\mathbf{1 0 0 \%}$ |

Assuming a minimum requirement that commissioners have lived in Los Angeles for 3 years, half of the residents that participated in the research believe that only citizens who are registered to vote should be eligible to serve as a member of an independent redistricting commission.

If on the ballot today, would you vote for or against an independent redistricting commission?

|  | Weighted <br> Frequency | Percent |
| :--- | :---: | :---: |
| Weighted Base |  |  |
| I would vote FOR independent redistricting | 1,222 | $75 \%$ |
| I would vote AGAINST independent redistricting | 401 | $25 \%$ |

| All adults in Los Angeles | 238 | $15 \%$ |
| Weighted Base | $\mathbf{1 , 6 2 4}$ | $\mathbf{1 0 0 \%}$ |

## Corruption in the Los Angeles City Council

Eight in ten Angelenos feel the level of corruption in the Los Angeles City Council should at least raise concern and/or is more than most government bodies.

- Residents that are happy with how things are going in LA currently or feel the LA City Government is effective are more likely to say there have been very few corruption problems.

When asked about the ethics rules that regulate the actions of elected officials, 9 of 10 feel rules should be made stronger. Half say the rules are too lax and should be made much stronger and another $40 \%$ say the rules are "OK" but should be made just a bit stronger.

- Again, residents that are happy with how things are going in LA currently or feel the LA City Government is effective are more likely to say the rules do not require reform.

Three-quarters of residents believe that having council members hold power over land use decisions (which development projects are permitted and which are not) is a bad idea and invites more corruption.

About two-thirds of the residents that participated in this research are aware of the recording of three city council members after a debate surrounding the drawing of district lines. One-third indicated they heard the recording, about onethird did not hear it, but heard about it from the news or friends/family.

How would you rate the LA City Council overall with respect to the levels of corruption?

|  | Weighted <br> Frequency | Percent |
| :--- | :---: | :---: |
| Has had very few problems | 318 | $20 \%$ |
| Has had enough corruption <br> problems to raise concern | 880 | $54 \%$ |
| Has more problems than most <br> government bodies | 427 | $26 \%$ |
| Weighted Base | $\mathbf{1 , 6 2 4}$ | $\mathbf{1 0 0 \%}$ |

Do you think the ethics rules that regulate the actions of elected officials should be reformed and made stronger?

| Rules are too lax and need to be | Weighted <br> Frequency <br> made much stronger | Percent |
| :--- | :---: | :---: |
| The rules are doing OK, but <br> could be a bit stronger | 681 | $47 \%$ |
| Rules are functioning well and <br> do not require reform | 176 | $11 \%$ |
| Weighted Base | $\mathbf{1 , 6 2 4}$ | $\mathbf{1 0 0 \%}$ |

Do you think having council members hold power over what development are built or not built creates a danger of corruntion?

|  | Weighted <br> Frequency | Percent |
| :--- | :---: | :---: |
| Yes, this is a bad idea | 1,224 | $75 \%$ |
| No, the council is best suited for <br> these decisions | 400 | $25 \%$ |
| Weighted Base | $\mathbf{1 , 6 2 4}$ | $\mathbf{1 0 0 \%}$ |

Have you heard about the recording of three council members thought to be using offensive / racist language?

|  | Weighted <br> Frequency | Percent |
| :---: | :---: | :---: |
| Yes, I heard the recording | 554 | 34\% |
| I did not hear the recording but heard about it | 504 | 31\% |
| I have not heard about this recording | 566 | 35\% |
| Weighted Base | 1,624 | 100\% |

## Ethics Reform

In general, residents are in favor of ethics proposals that are meant to strengthen requirements and reduce corruption. Residents would be in favor of:

- Strengthening rules regarding lobbyists, gifts and/or campaign contributions ( 3.3 mean on a 4 point scale, where $4=$ Strongly favor)
- Establishing rules governing the Ethics Commission budget so that the City Council is unable to threaten budget cuts to pressure the commission (3.22 mean on a 4 point scale, where 4=Strongly favor)
- Give the City Ethics Commission greater resources including staff and budget to do better enforcement ( 3.12 mean on a 4 point scale, where 4=Strongly favor)
- Give the City Ethics Commission the power to put reform proposals on the ballot for public vote without the City Council having to approve it ( 3.05 mean on a 4 point scale, where 4=Strongly favor)
- Remove land use decisions from the hands of the city council ( 3.01 mean on a 4 point scale, where 4=Strongly favor)

## METHODOLOGY

The quantitative survey data collected for this research project consisted of two modes of collection:
(A) An internet survey sample at city of Los Angeles level
(B) A computer assisted telephone interview (CATI) phone sample at the city of Los Angeles level

## Internet Sample Information:

ISA used its proprietary database to send invitations to Los Angeles City residents to participate in the internet study. ISA also has access to many online panels partners and databases with millions of respondents that can be reached via email or through online portals. The online panels are recruited from multiple channels, including online, telephone, mobile, face-to-face, social media, and print. ISA conducts thousands of surveys every month for their clients using these databases.

## CATI Phone Sample Information:

The STS Listed Landline Sampling Database is based upon a variety of consumer data and consists of landline telephones, complete with name, address, and hundreds of robust data elements from which to select. The initial point of compilation is telephone white page data and is augmented with many different data sources including product purchase data, warranty card information, survey data, magazine subscriptions, survey data, and other similar sources. Additional information is appended using public record information and census data.

The STS Enhanced-Wireless ${ }^{\text {TM }}$ Sampling Database is based upon a very large database of known wireless phones and self-reported data that is collected using a variety of proprietary techniques. Using Enhanced-Wireless ${ }^{\text {TM }}$, samples can be targeted to specific demographic groups, including age, income, gender, presence of children, and ethnic groups - just to name a few. Enhanced-Wireless ${ }^{\text {TM }}$ was developed by STS using a proprietary set of databases that includes product purchase data, warranty card information, survey data, and many other similar sources of information.

Given two modes of collection of survey responses based on convenience sampling, the LAGRP Survey data arises from non-probability (non-random) sampling design. That is, the probability of selection of residents of Los Angeles city for either mode at city, district or neighborhood level was not developed beforehand based on list or geographical frame.

The primary data collection was conducted between October 6 and October 20, 2023. A total of 1,624 Los Angeles City residents participated in the research; 600 collected via phone and 1,024 via online interviews. All of the data collection was conducted by Interviewing Service of American (ISA).

To make sure only city residents participated in the study, potential participants were asked for the zip code of their current residence. If outside the city of Los Angeles zip list, the interview was rejected. The screener consisted of about 10 questions including age (must have been 18+), gender, and ethnicity of participants, and quotas were set based ethnicity and mode (see table below for quota targets).

If a person who completed the screener belonged to a group whose quota had not been met, then the participant was rejected.

Quota Targets:

| Minimum Quotas by method | Phone $\mathbf{- 6 0 0}$ | Online $\mathbf{- 1 0 0 0}$ | Total - 1600 |
| :--- | :---: | :---: | :---: |
| White (Gen pop sampling) | 200 | 400 | 600 |
| Hispanic (Gen pop sampling) | 200 | 400 | 600 |
| Black - Total | 100 | 100 | 200 |
| Black (under 40 yrs. - sub quota of Total) | 30 | 30 | 60 |
| Other | As it falls | As it falls | 0 |
| Total Asian | 100 | 100 | 200 |
| Filipino | As it falls | As it falls | 0 |
| Chinese | As it falls | As it falls | 0 |
| Korean | As it falls | As it falls | 0 |
| Other Asian | As it falls | As it falls | As it falls |
| Total | $\mathbf{6 0 0}$ | $\mathbf{1 0 0 0}$ | $\mathbf{1 6 0 0}$ |

| Quotas by Ethnicity (minimums): |  |
| :--- | :---: |
| White | 400 |
| Latino | 400 |
| Black (min of $\mathrm{n}=100$ under 40 yrs.) | 200 |
| Asian | 200 |
| Other/Mixed ethnicity | no quotas |

Actuals:

| Minimum Quotas by method | Phone - 600 | Online - 1024 | Total - 1624 |
| :--- | :---: | :---: | :---: |
| White (Gen pop sampling) | 160 | 380 | 540 |
| Hispanic (Gen pop sampling) | 206 | 300 | 506 |
| Black - Total | 109 | 105 | 214 |
| Black (under 40 yrs. - sub quota of Total) | 27 | 42 | 69 |
| Total Asian | 105 | 105 | 210 |
| Other/Mixed | 20 | 134 | 154 |
| Total | $\mathbf{6 0 0}$ | $\mathbf{1 0 2 4}$ | $\mathbf{1 6 2 4}$ |

To compensate for the non-random sampling, we used weighting techniques to make the sample reflect the city's age within gender, ethnic and income characteristics as much as possible. Using this approach, we can generally apply the results provided by the survey participants to residents who were not surveyed but share their demographic characteristics.

This table shows the breakdown of various demographic variables in this survey. Frequency shows the unweighted number of valid survey responses, followed by the unweighted percent of total.

The weighted percent shows the percentages for valid responses used in the analysis after weights are applied. The weights were developed using the U.S. Census Bureau American Community Survey (ACS) Data.

|  | Frequency | Unweighted Percent | Weighted Percent | ACS Census Percent Los Angeles City Adults 18+ |
